# Tools for Today's Care — Everywhere

## + Check-In and Discharge

Automate patient registration, admission, billing, and payment processes to better engage patients in their care.

## + Patient Room

Foster a human connection with smart care delivery rooms that give patients choice, control, and comfort.

## + Diagnostics (Radiology/Medical Imaging)

Improve imaging retrieval, storage, and viewing efficiency to power diagnosis and speed care delivery.

## + Data Center

Boost IT infrastructure to improve app uptime, increase clinical productivity, and advance the patient experience.

## + Home Health/Telehealth

Support remote patient monitoring, diagnostics, and caregiver collaboration to deliver customized care — anywhere.

# Thinkcentre - administration and support

# An Optimized Virtual Desktop Experience

**Doctors' Lounge/  
Consult Room**

**Patient Room**

**Nurses' Station**

## ROAMING DESKTOPS

# Why Leverage Virtual Desktops?

## Data Security

Deliver secure, compliant access to users' unique desktop experience, data, and apps without local data storage

## Clinical Mobility and Access Speed

Real-time SSO slashes login access times and speeds care delivery

## CapEx to OpEx Streamlining

Reduce complexity of capital expenditure planning and shift costs to OpEx

## Secure BYOD

Support secure access from any device — clinicians quickly and safely log in and out of their desktop with personal, familiar devices, streamlining workflow

## Direct IT Management

IT administrative control over desktop environments ensures security and compliance

# Lenovo Thin Computing Devices

- **Lenovo M625q Thin Client**  
(replaces M600)
  - Desktop based thin client
  - Perfect for Skype for Business, Cisco Jabber and UC applications
  - Low and affordable cost base
- **Lenovo M75n IoT (Fanless)**
  - Desktop based thin client with Nano Form Factor
  - Perfect for Skype for Business, Cisco Jabber and UC applications
  - Low and affordable cost base
- **Lenovo M75n nano (Fan)**
  - Ideal for power users
  - Perfect for Skype for Business, Cisco Jabber and UC applications (4K)
  - Fast, powerful processors
- **Lenovo L480 Laptop Thin Client**
  - Perfect for secure, on-the-go computing

# See What Tiny Can Do

## Big Healthcare Impact. Tiny Footprint.

### Simple Scalability

### Processing and Support

#### POWERFUL PROCESSING

#### OS SUPPORT

### Unmatched Mounting and Expansion Options

### Instant Transformation

Instantly transforms into an AIO with **ThinkCentre® Tiny-in-One**

# Tiny-in-One Display

## The Power to Transform

Create your own “modular” all-in-one PC by housing ThinkCentre® Tiny inside the back of a Tiny-in-One Lenovo display. Unlike all-in-one PCs, you can now upgrade the display and computing power separately, ensuring you get more use from your assets over time.

The ThinkCentre Nano is fully compatible with the rich ecosystem that Tiny delivers — mounting in all areas. It's also fully compatible with the Tiny-in-One ecosystem, protecting and future-proofing your investment.

Simplify desktop cabling

ThinkCentre Tiny-in-One

# Tiny-in-One 22, 24 and 27

**Flexible, Upgradable, and Easy to Install**

**Before**

**After: Tidy with Tiny**

**One cord provides power to both Tiny and the display.**

**The display can also be used as a stand-alone monitor.**

- Single power cord
- External power supply
- VESA mountable
- Up to 5 FHD monitor outs
- 6 USB ports (2 front, 4 back)

**The Tiny family provides CPU/OS flexibility and power consumption options.**

- Tiny PC or Nano PC
- Thin client
- AMD or Intel PC or workstation class

Lenovo  
Health

# Patient Room

Lenovo

# The healthcare setting demands more from devices

The **ThinkPad® X13 Yoga** is designed to work as hard as your clinicians with 4 modes

- 16-hour, 50W-hour battery supports demanding clinician workflows
- Rapid charge support for quick recharging between shifts (80% battery charge in one hour with 65W charger)
- Lenovo USB-C Power Bank available
- Easy handwriting with integrated Stylus

 Windows 10

The best devices in the world run Windows 10 Pro

# This is a Job for a Workstation

## DIAGNOSTICS

High-performance image processing for reading rooms and home reading — with monitors calibrated to the cloud so radiologists are looking at the same color regardless of location

## CARDIOLOGY, RADIOLOGY, AND ALL THE “OLOGIES”

Processing power to support clinicians who use multiple applications at once

## DATA SCIENTISTS

Speed and reliability for big data analysis, laboratory operations, machine learning, deep learning, and genomic research

## OPERATING ROOMS

Performance for computer-assisted surgical procedures

# ThinkStation

## ThinkStation P720

Powering real-time analytics, lab operations, and research

- Parallel processing for big data analysis
- Up to 60TB of HDD storage and support for up to 12 drives
- Supports multiple monitors for diagnostic workflows
- GREENGUARD certified and up to 92% efficient

## ThinkStation P520

Performance for every specialty department in the hospital

- Compatible with most industry-leading GPUs to support imaging
- PACS/RIS readiness to meet imaging demands
- Barco certified

## ThinkStation P330 Family

Versatility for use in numerous settings

- The Tiny form factor is 96% smaller than a traditional workstation — can be used in non-traditional spaces where towers won't fit
- Supports up to 6 independent displays for the P330 Tiny
- Eizo and Barco certified
- Configured up to Core™ i9, NVIDIA Quadro P1000, 64GB of RAM, and 2TB SSD

Lenovo  
Health

# Home Health/Telehealth

# The value of going virtual

**Improve access  
to patients**

**Enhance provider  
efficiency**

**Less PPE**

**Less infection  
exposure**

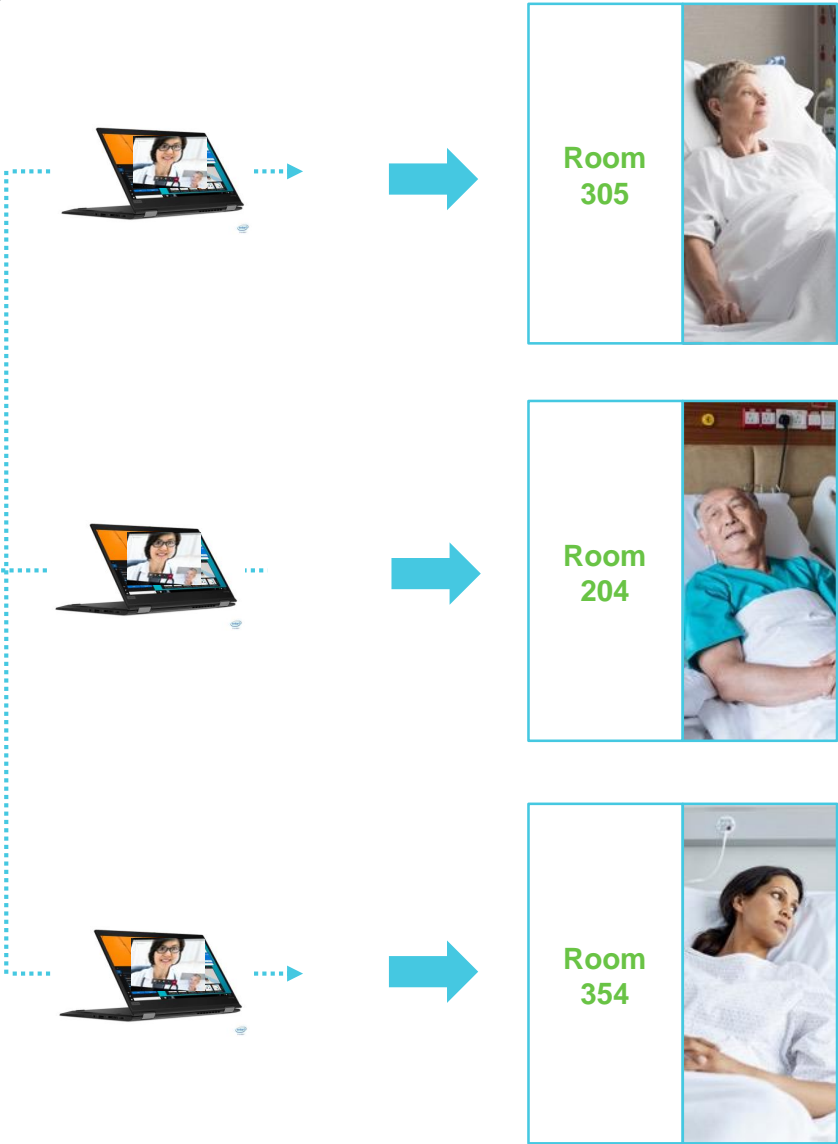

# Convenient, efficient, safe visits

Provider in any location

Access to any patient, anywhere!

# THINKSMART HUB 500

# Software Portfolio

ThinkShield

Autonomous endpoint security platform that lives on each device, predicting tomorrow's attacks and enabling devices to self-heal from broad modes of attack instantaneously

Provides IT admins with the capability to secure endpoints, assess risk, respond to security incidents, and apply remote security measures to protect each device and the data it contains.

WinMagic SecureDoc Enterprise is a flexible, scalable solution designed not only to protect data and ensure compliance, and optimize operations and enable a unified encryption strategy.

Unified Endpoint tool which allows IT admins to manage all devices regardless of OS or device type.

Microsoft SCCM plug-in that simplifies Lenovo BIOS, driver, and 3rd party application updates.
