Lenovo

Technology Is Transforming Every Industry

Modern Apps Are Complex and Distributed

Traditional Data Centers are Unable to Keep Up

Complex

Inefficient

Slow

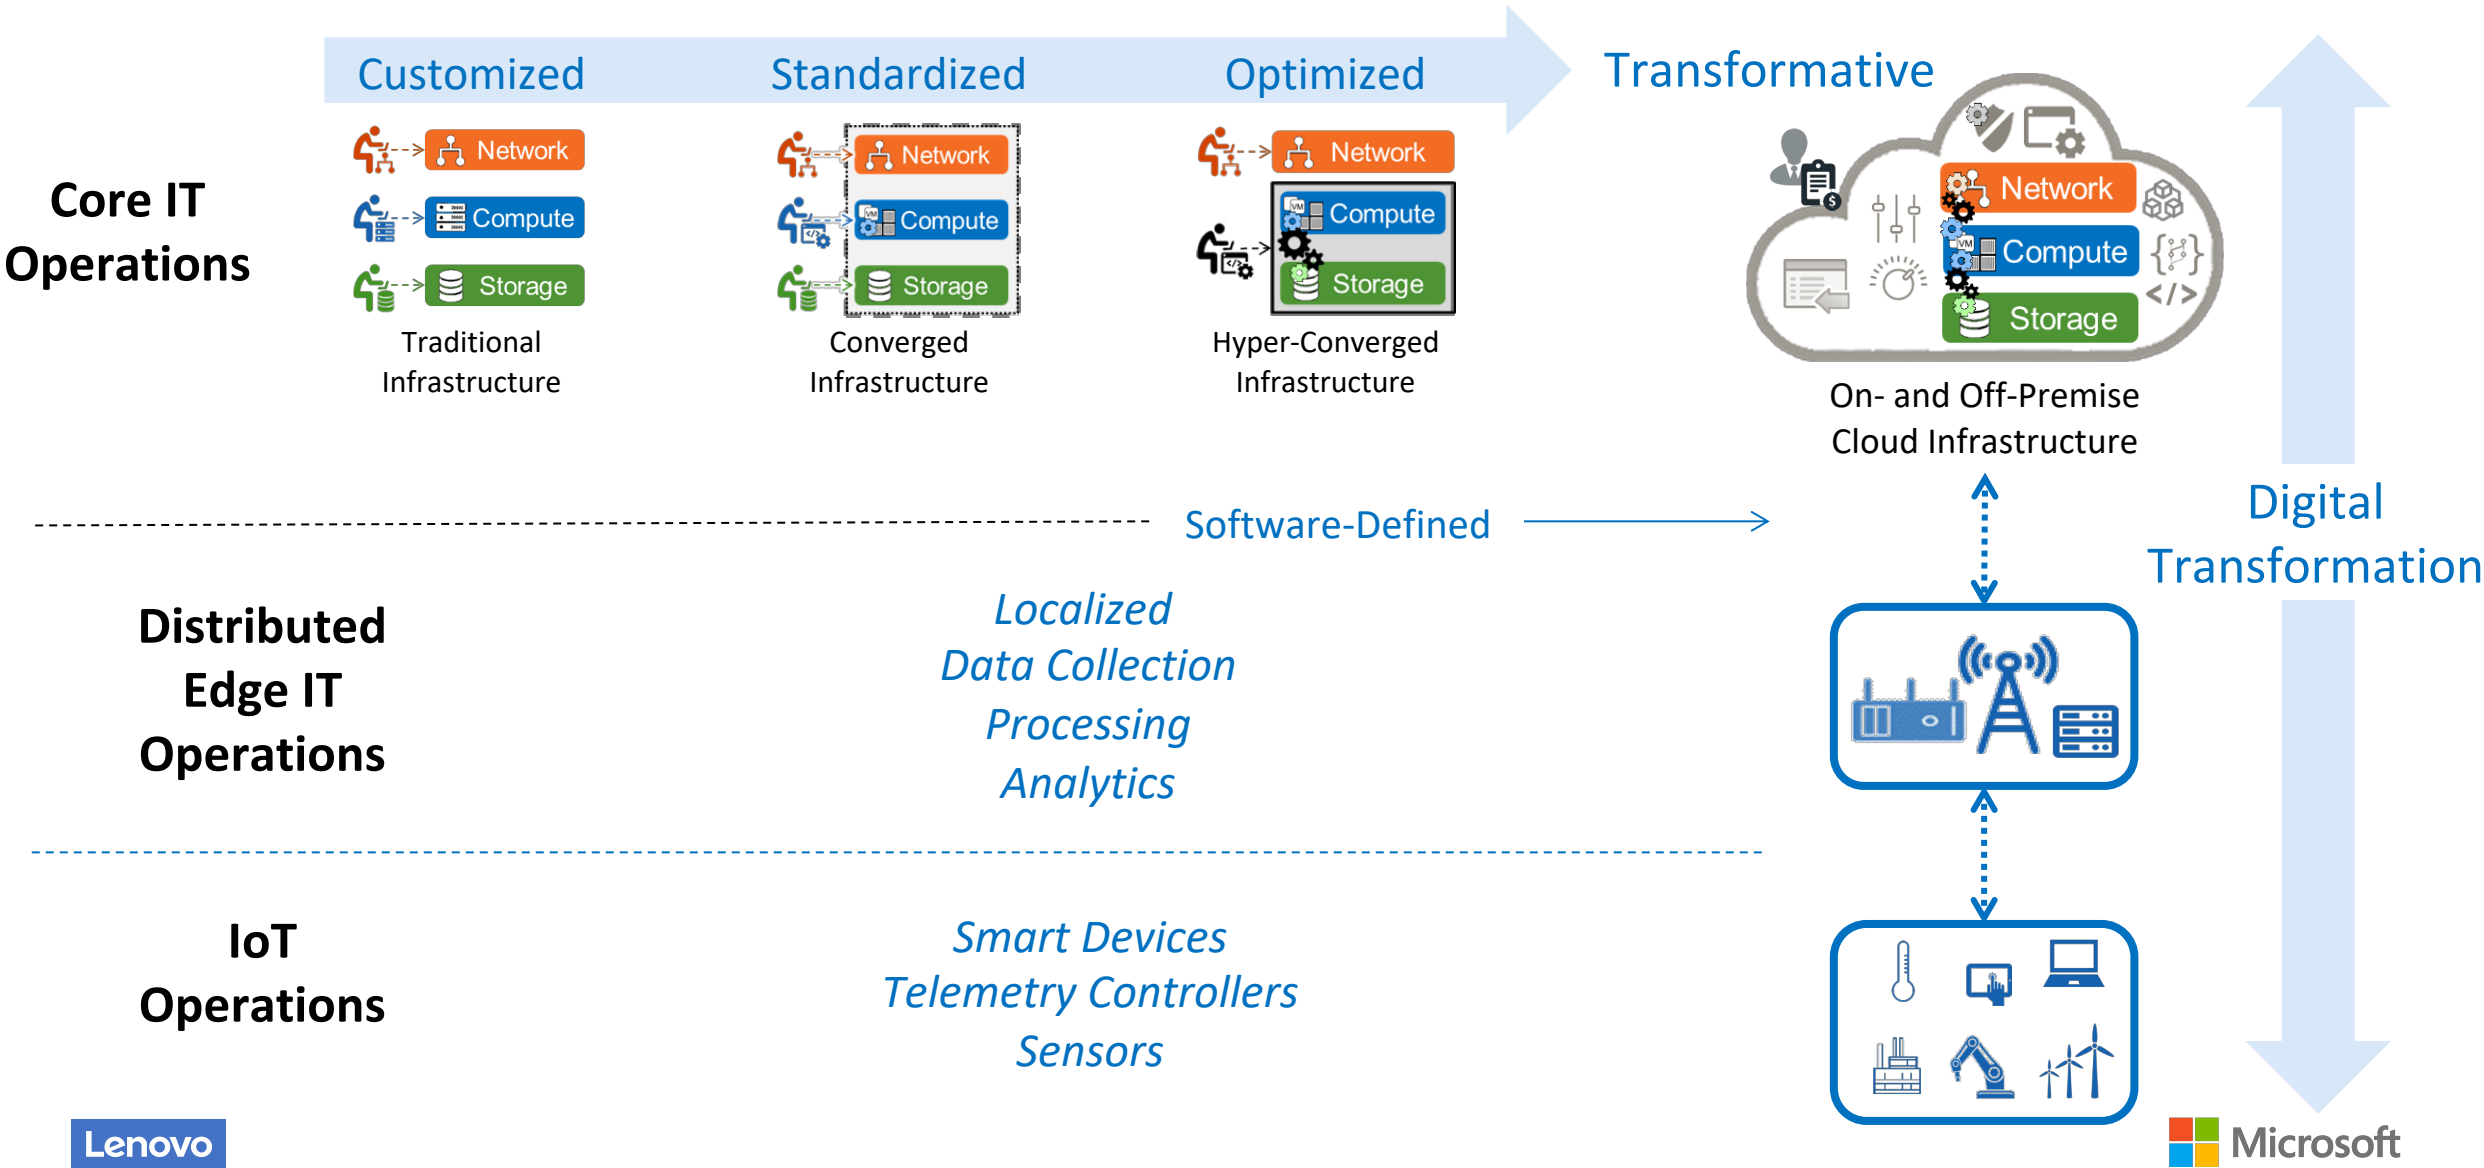

High Risk

Siloed

IT Evolution supporting Business Transformation

KEY TRENDS

Aggressive innovation redefines the DATA CENTER

SOFTWARE on Standard Hardware
displaces specialized hardware...

**SOFTWARE DEFINED
ACCELERATES**

Flash is the new DISK

Disk is the new TAPE,

50~100X faster than Flash ...

... **NVM EMERGES**

Accelerators will deliver
significant value for next gen
applications

BIG DATA, IOT & AI

Rise of
HYBRID CLOUD

**AUTOMATION
of
SYSTEM MANAGEMENT**

Transformation

Building foundations for our customers strategic workloads and requirements

CUSTOMIZE

Creating a customized solution, tailored to their business needs, through traditional IT

MODERNIZE

Renovate on-prem IT to drive efficiency and agility with virtualization or hyper-converged infrastructure technologies

TRANSFORM

Reduce customers overhead with a turnkey cloud solution that is fully-automated and pre-integrated

Who is Lenovo?

Since
1984

Four Decades of Transformation

1994-
2004

Lenovo released and sold its own branded PCs and became the top brand in China with a market share of 30%.

2004-
2014

Acquired IBM PC, started globalization, and became #1 PC company in the world

2014-
2018

Acquired IBM System x and Motorola transforming to multiple business model

2019-

3S strategy to fuel the next generation of smart solutions

Smart IoT

Smart Infrastructure

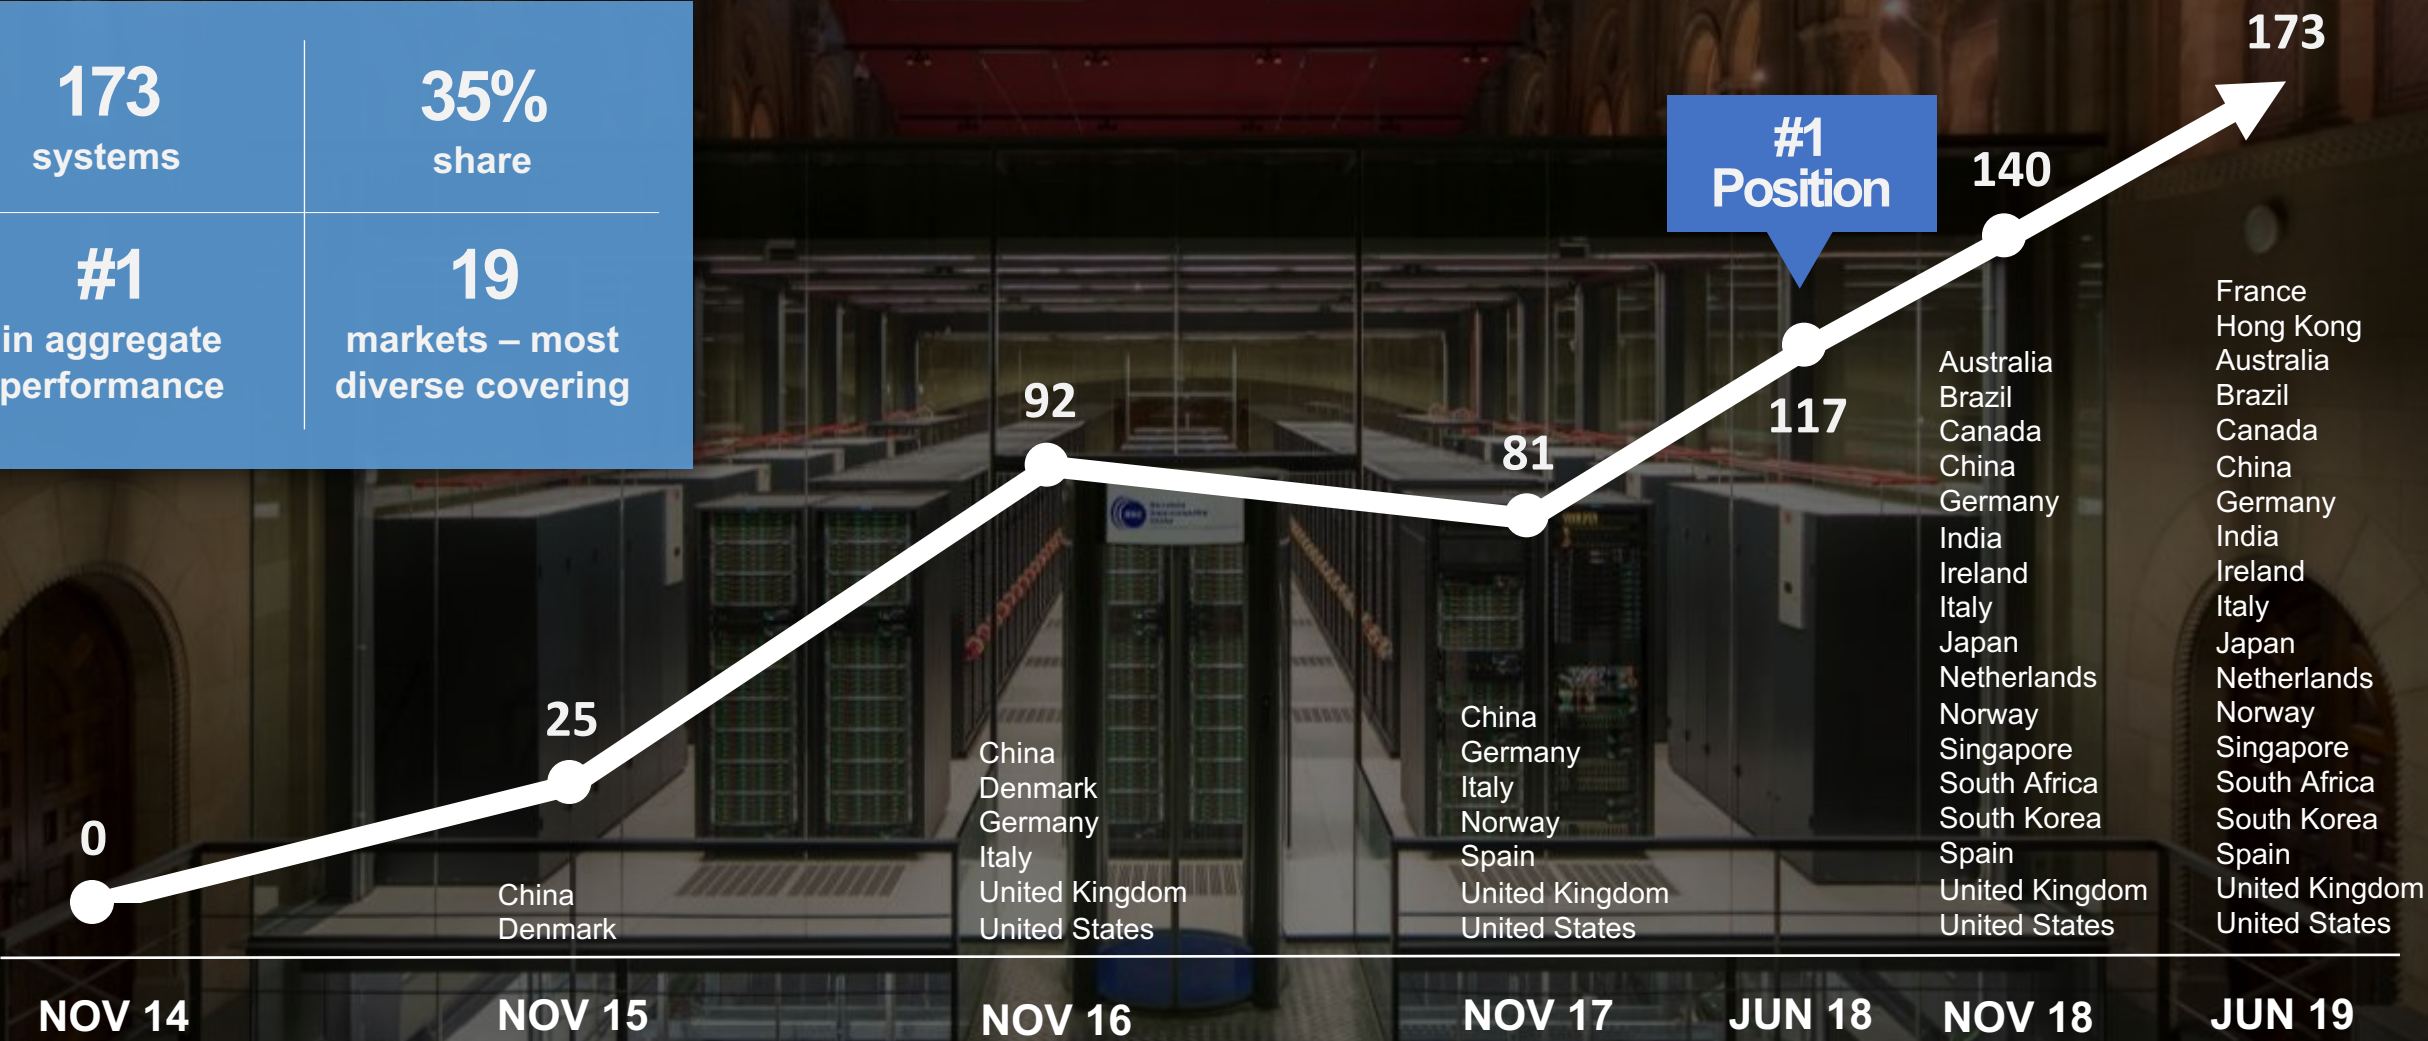

Smart Verticals

#1 Provider of supercomputers in the world

More than 1 in 3 run on Lenovo

173 systems	35% share
#1 in aggregate performance	19 markets – most diverse covering

Based on count of listing on the Top500.org June 2019 list.

Solutions for Hybrid IT

Fast: Industry Leading Performance with ThinkSystem Servers

ThinkSystem Servers have been engineered to extract the maximum performance possible out of the Intel and AMD architectures with 189 #1 benchmarks as of 5-07-2020

PERFORMANCE	Total #1 Benchmarks by Workload Across All Generations of ThinkSystem Servers							
	Transaction Processing	Virtualization	General Computing	Energy Efficiency	SAP	Data Analytics	Java Applications	High Performance Computing
	5	9	36	10	17	51	35	26
	TPC-E	SPECvirt sc 2013	SPEC CPU	SPECpower _ssj2008	SAP SD 2T & BWoH	STAC-M3 TPCx-IOT TPCx-BB	SPECjbb2015	SPEC MPI2007 SPEC OMP2012 SPEC ACCEL

USE CASE – Healthcare

Industries:

Hospitals , Clinics , Pathology labs etc.

- VDI enables the admin team to customize rules and permissions based on the individual virtual desktop, this becomes extremely convenient in healthcare settings where **privacy** is a concern.
- By designating specific permissions, each medical professional can have their own virtual desktop that only allows them to see their **relevant patient records**.
- Furthermore, they can move from device to device throughout the day, boot up their virtualized desktop, and access the records they need.

Workplace Challenges

Increasing **mobility** of work

Ownership of end-point devices is changing with **BYOD** programs

Data security and **compliance**

Complexity and cost of managing existing desktop environments

Need for **high availability solution**, and **rapid recovery** from theft, failure and natural disasters

Lenovo VDI End to End Solution

Solution Components

The Solution

Endpoints

- Variety of devices
- Lenovo Terminal Manager

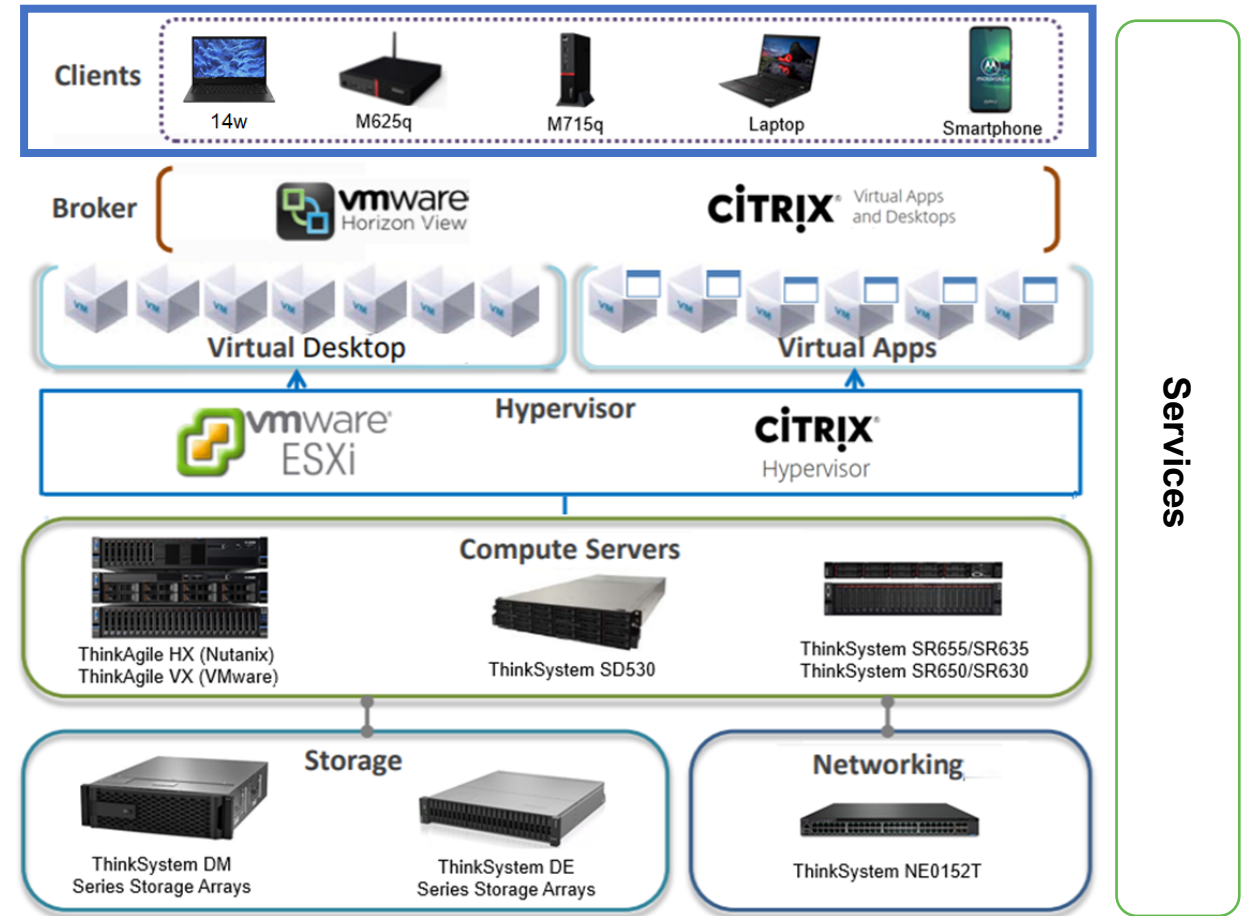

Software

- Citrix resell (NA)
- VMware Horizon
- NVIDIA GRID/Quadro

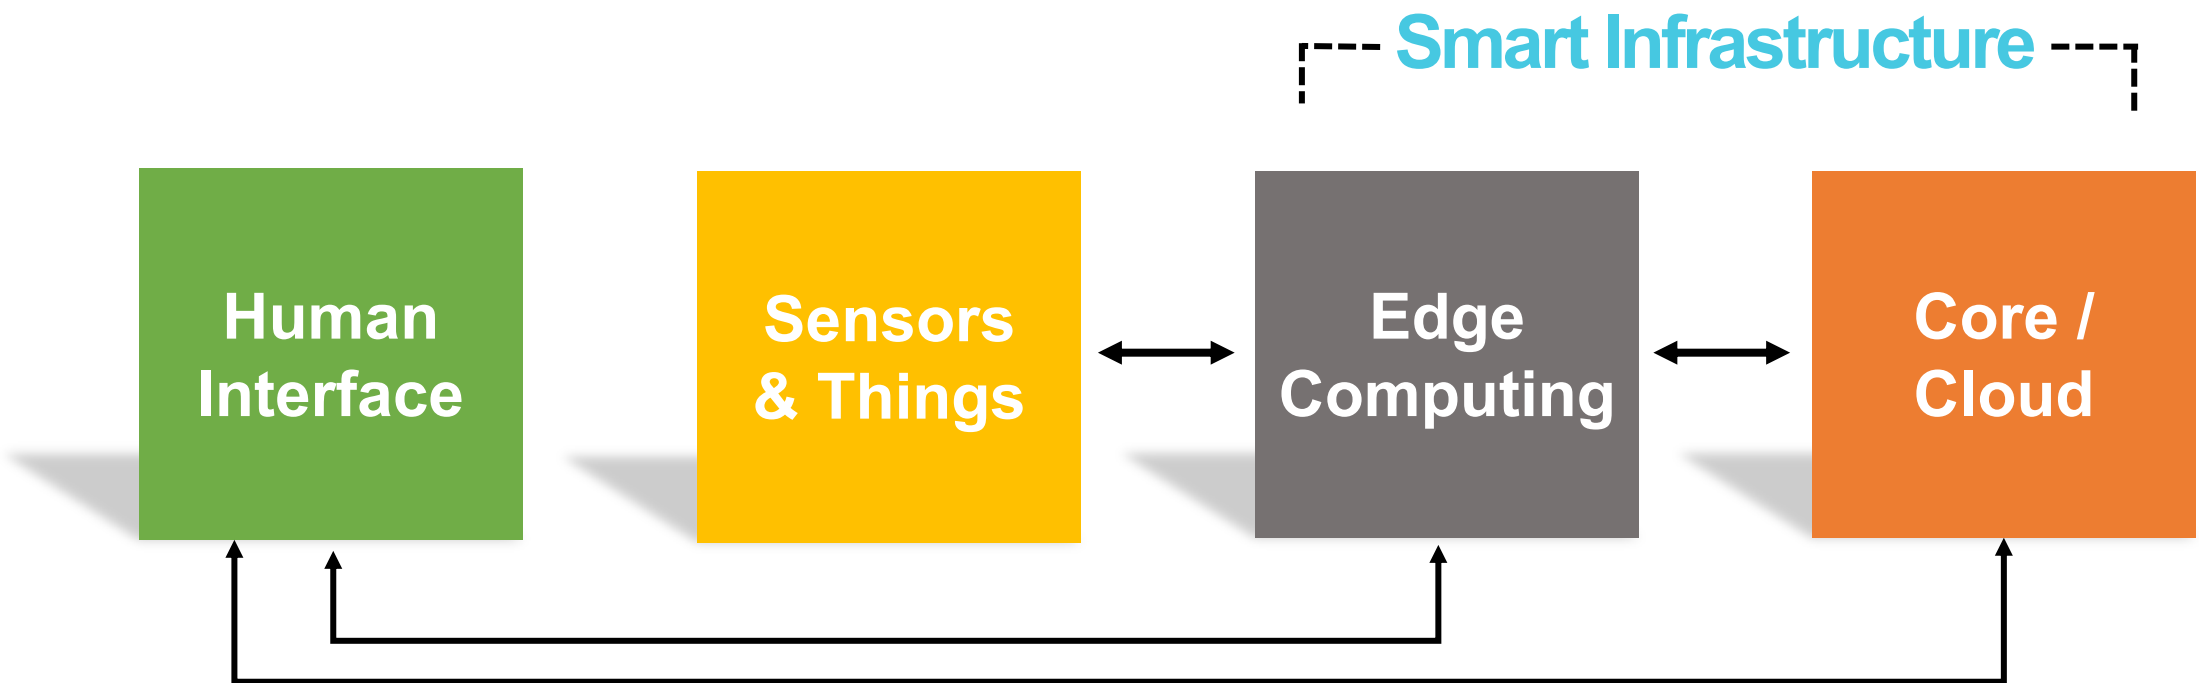

Infrastructure

- ThinkAgile servers

Services

Smart Infrastructure Architecture

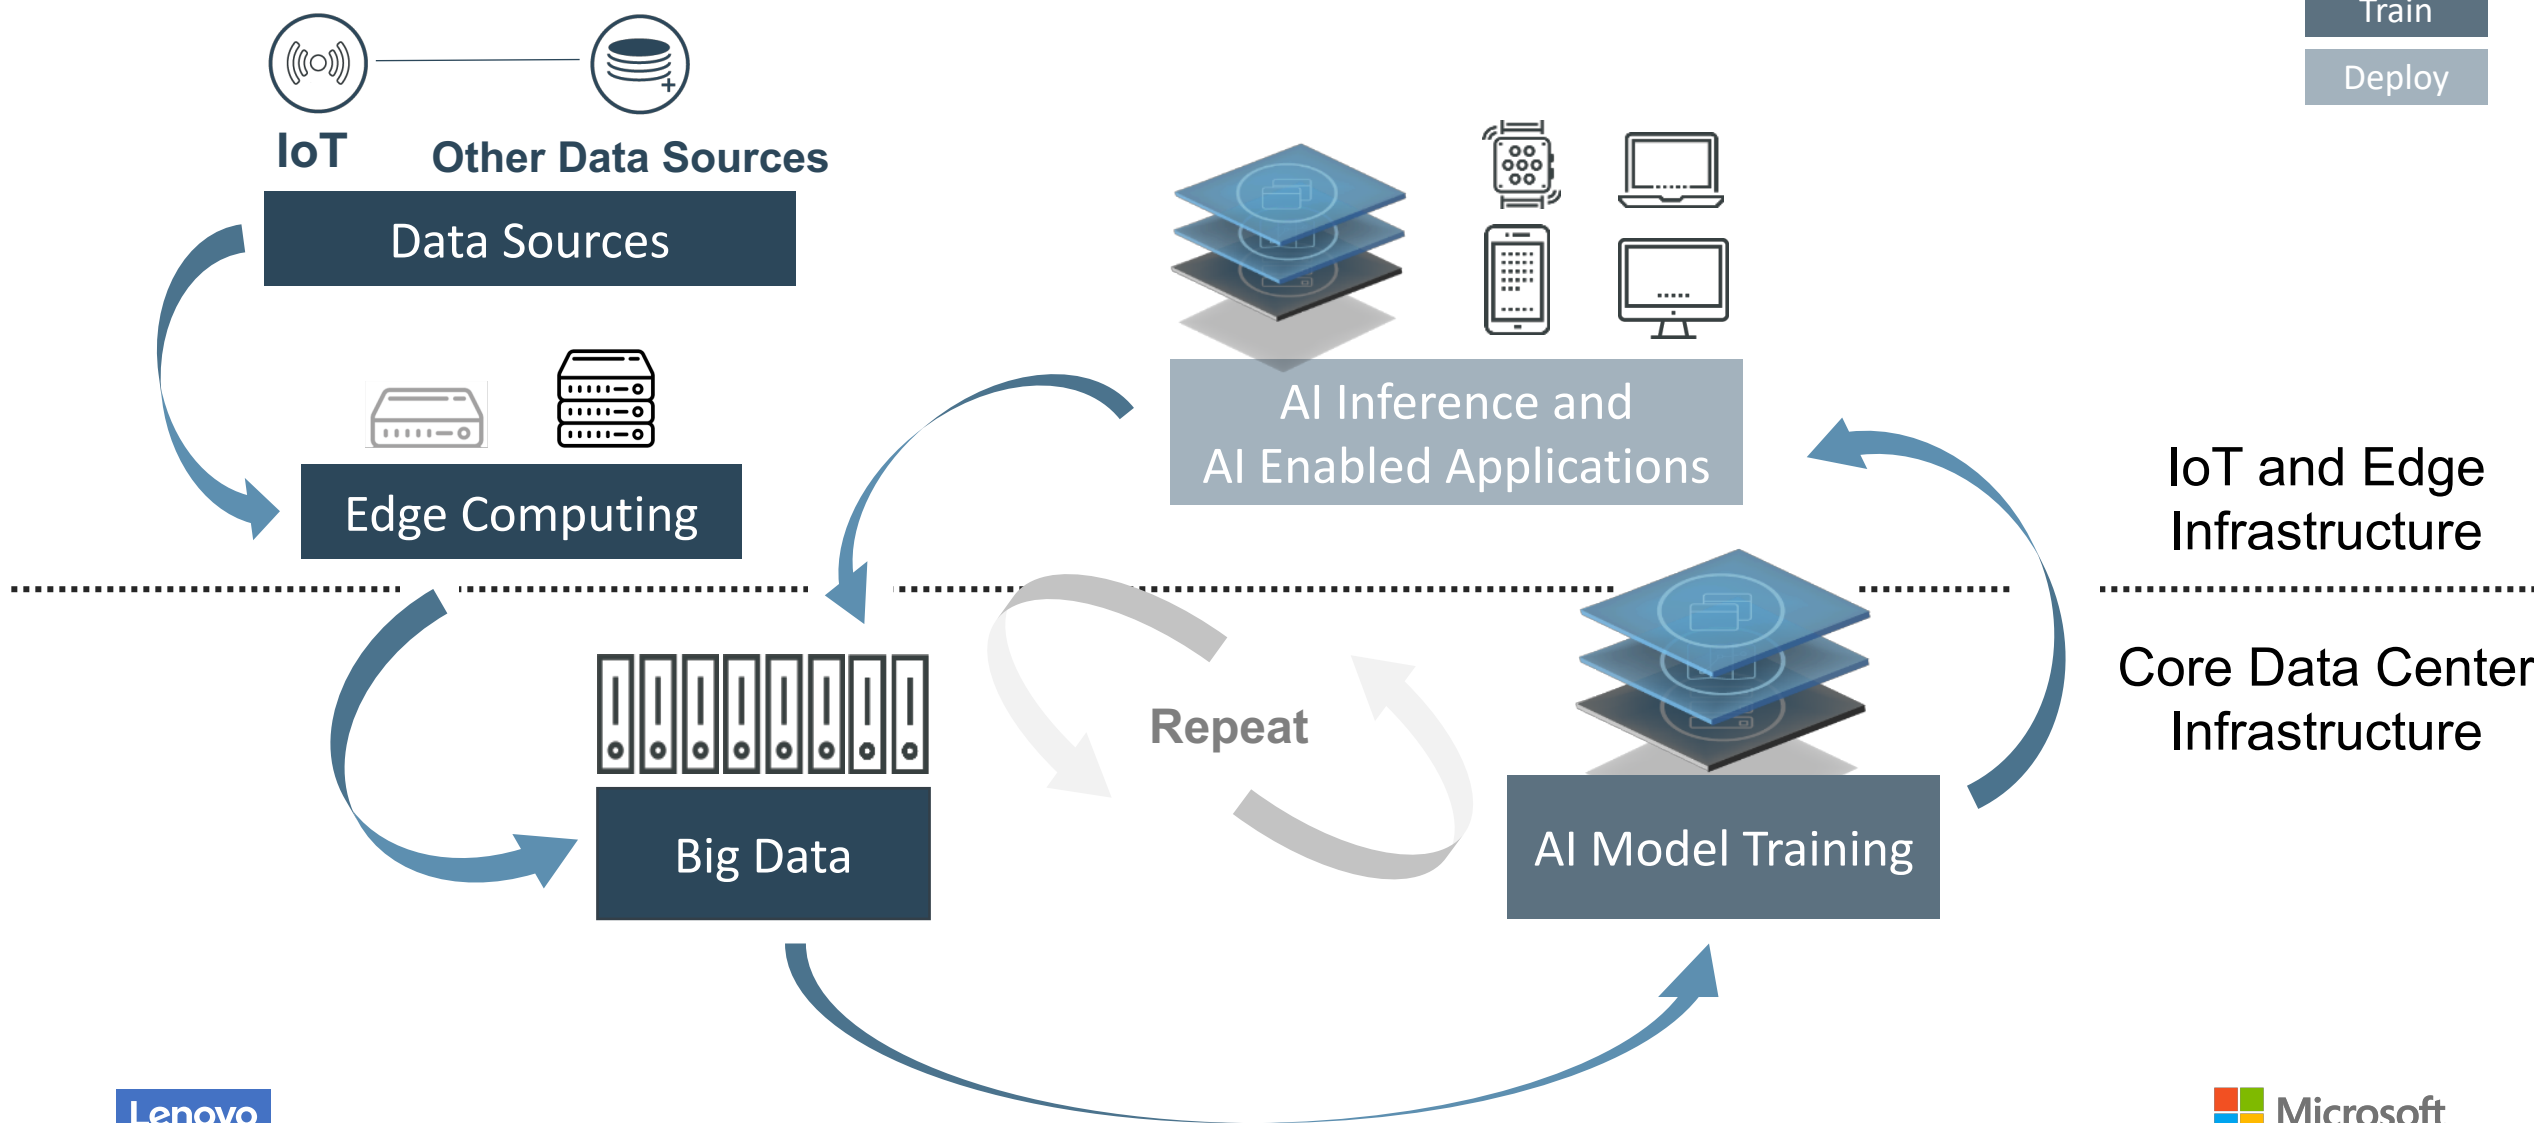

Functions	Human Control Visualization	Generate Data Interact w/ physical world	Collect Pre-process Automate Analyze Forward	Store Data Deep Analytics Automate Control
